Other	Spring 5, Spring rest services, Full Stack Development, MS Office

Summary of Projects

(FLP- Project)Cap Store   **(Duration) 1 Week Training Project**

(Role) Team member

Cap Store Shopping Application

Cap Store is a web based e-commerce website that allows users to buy or sell products. Users can view products from different categories and buy them. The user will be able to see products of similar category, sort them, compare them, Place order.
This site gives a feel of already established e-commerce websites like Flip Kart, Amazon, etc. with aim to enable employees buy goods online while sitting in office or from home i.e. irrespective of their locations.
The whole Cap Store project was divided into many modules and each trainees worked on individual modules that are supposed to be integrated together into a complete shopping site. My individual task in this project is "Home Page" module. I am responsible for designing the Cap home store page front end part and I also involved in designing back end part of showing products in order of category and in search bar.

Environment: Java 8, Spring Boot 2.0.4, My SQL 5.5, JSP
Technologies used: HTML, CSS, Java Script, JSP and Bootstrap

Project-2:

(Role) Software Engineer   (Duration) 5 months

This project was related to application maintenance. My role in this project was to look at Internet Banking customer issues. My task is to analyze the issue faced by the customer at the back end by finding the issue in the logs and also we will analyze the error codes to fix the issue at the back end side and also we will monitor IB by using grafana from end to end basis which gives the clear picture of issues going in IB. Other than these things, I also work on Change request, Restart/Reboot, PEP.

Environment: Java 8, Unix, SQL.
